Open PhD Position

(4 years, full-time, from Sept 1, 2026)

Human-AI Interaction for Sustainability

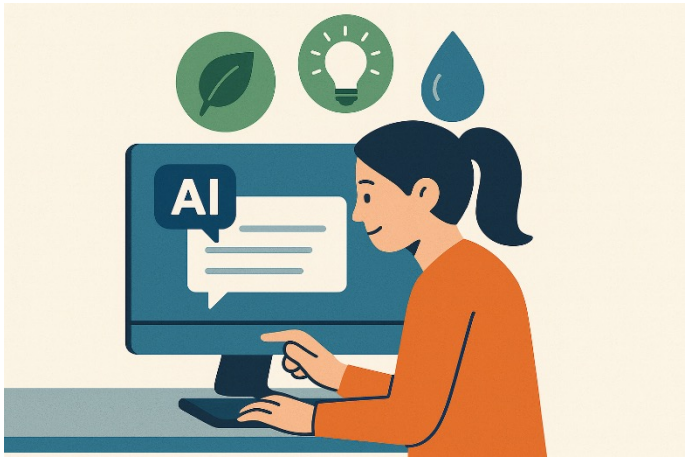

LIT Robopsychology Lab

JKU Linz, Austria

We are seeking a PhD researcher at the intersection of Human–AI Interaction, Psychology, and Sustainability within the new Doctoral College "Computational Sustainability" at JKU Linz and TU Vienna, Austria.

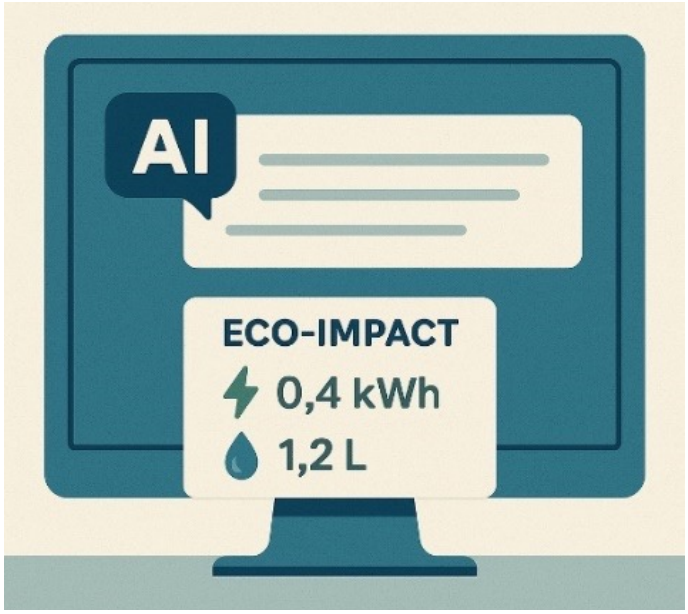

Research focus

The PhD project shall explore how prompting strategies, interface design, and human perceptions of AI impact the energy and resource demands of LLMs. Project details: https://computational-sustainability.at/HAI4S/

What you will do

- Conduct dedicated empirical research (e.g., user studies) on Human–AI Interaction for Sustainability
- Publish regularly in peer-reviewed venues and participate in academic conferences
- Teach university courses and guide students
- Support administrative tasks and contribute to science communication and outreach activities

Your profile

- Very good Master's/Diploma degree in Psychology, HCI, Computer Science, AI, or a related field
- Clear willingness to acquire complementary interdisciplinary competencies
- Good knowledge of empirical research methods and data analysis techniques
- Clear and precise academic writing skills
- Very good English; German skills are an advantage
- Strong interest in computational sustainability
